1. The Dilemma

1. God is the Timeless, and this universe and everything in it is in Time.

2. God is without Time, and cannot be known by beings in Time. It is impossible.

3. God is the divine, and everything in this universe is worldly. All the beings in Time are worldly.

4. Yet all beings in Time feel the pull of the Timeless God, and all beings seek Him.

5. But, all beings only know the world of Time, and they mistakenly seek God in Time, but He is not there.

6. This is the dilemma. Beings in Time long for the Timeless God, but it is impossible for them to know Him.

2. The Timeless Knowledge

1. This universe is reincarnating in the Timeless God as the Space/Time universe.
2. This is the beginning of all evil, and the Timeless God wants this reincarnating evil destroyed.
3. Reincarnating Time begins as a spinning motion spiraling downward. This generates the illusion of the field of space within the spirals. A history of spirals begins the illusion of Time.
4. At the center of the spinning wheel of Time is an illusion of a center point. This center point becomes the illusion of a Me/Self and the spiraling perimeter becomes the illusion of World.
5. The illusion of Existence is created by persistent rhythms of Me/World, Me/Word, Me/World. This is the foundation of all personalities in Time.
6. Thus, all personality is transient, moment to moment and is not real or stable. It is an illusion, a dream, within the spinning wheel of Time. Therefore, no personality in Time is spiritual, or knows the Timeless.

2. The Soul

1. The illusory personality at the center of the spinning wheel of Time is called the soul.

2. From the top to the bottom of the spinning wheel of time is a continuum of personality and soul, so the soul is not one entity or personality but just a temporary viewpoint along the channel from the universe to your individual soul and personality.

3. Thus your existence, your world, changes as your personality and soul ascend and descend in this channel created by the spinning wheel of time.

4. So there are two great motions in existence. There is the vertical motion, which is the descent of the spinning wheel of Time, and there is the circular motion, which is spinning of the wheel of Time itself.

5. All personalities in Time are bound up with these two motions as the foundation and limits of their experience and existence.

6. This is the structure of evil, and there is no personality within this maelstrom who is spiritual or knows the Timeless God.

3. The Mundane & Transcendental

1. The descent of the soul and personality has two levels, the transcendental and the mundane.
2. The transcendent has knowledge of personality as soul, and the mundane has only knowledge of personality, but has no knowledge of the soul.
3. For the mundane personality the soul is completely hidden. It appears as a witness to all experience and is unknowable. All that is known to the mundane is Me as the center of my experience of the world.
4. The transcendental personality upon ascending upwards through the channel of spinning Time finds he can transcend the mundane personality and become the universe. It is like a boatman who goes up a stream and enters a big river for the first time. He imagines his liberation.
5. The transcendent personality follows the river and reaches the sea, and cognizes, "I am the universe, I am the creator. There is nothing more." This is the delusion of reincarnating Time. He is not spiritual. He

is the beginning of the evil, which the Timeless wants to destroy.

6. From transcendent to the mundane, there is just the same delusions in Time, The transcendent cognizes a soul, and the mundane does not.

4. The Transcendent Evil

1. None of the personalities existing because of the descending wheel of Time are spiritual. They have no knowledge of the Timeless God.

2. Because the transcendental personalities are not spiritual, and don't know the Timeless God, they will eventually seek power and dominion over what is beneath them. They will abuse the mundane personalities beneath them in the channel of Time.

3. In their quest for power they learn to travel up and down the channel of time becoming various personalities and existences, just to assert dominion.

4. These evil demons have one basic teaching: They are the highest, the ruler of the universe, and the path to God is to worship them. They will lay down the laws of good and bad, right and wrong, and establish

their religions and kingdoms in the mundane world torturing and abusing the mundane personalities.

5. They appear in 10,000 ways and say 10,000 things. What they say will seem true, but ultimately it will be completely false. It will all be about them.

5. The Timeless God

1. The Timeless God exists prior to the reincarnating illusion of Time and is called spiritual.

2. The personalities in Time are not spiritual, and do not know the Timeless God. These beings have no way to know God. Everything they can do or conceive of is still in Time, and they can never know the Timeless. There is nothing that can be done..

3. But the Timeless exists. It is all there is. How can it be known? Our essence is this God and we want to fathom it. There is a way. Say a man were to go into his field every day and plant seeds. When it came time to pick the crop, wouldn't he receive whatever he planted? It is the same with the Timeless.

4. You have to go to the limits of existence, and realize the limitation and then go beyond. You are

trapped in a spinning wheel of existence through Time and the Timeless is not found there. The dissolution of the spinning wheel of Time is what needs to occur. It must end and it must end thoroughly.

5 This is the science and the art. No one in Time will tell you this secret. They will tell you some nonsense to keep you bound in Time. Do you understand?

6. You can find the limits of the spinning wheel. You can find the channel from you to the universal being. These are the limits of evil. Find what is outside all of that to know the Timeless. That is the spiritual path, and that is the only way.
